

EULA – End User License Agreement SEMAINE database (<http://semaine-db.eu>).

This user agreement applies to the Semaine database, first provided on the 18th of February 2009. It has been released by the Semaine consortium under specific conditions for sole scientific, non-commercial use by the Semaine consortium. The data was recorded for Semaine on the site of QUB (Queen's University Belfast). The database is stored and maintained by the iBug Group at Imperial College London and the Computer Vision Lab at the University of Nottingham (Imperial College London School of Medicine and Technology). By signing this document the user, he or she who will make use of the database or the database interface, agrees to the following terms. In this document, the term 'database' denotes both the actual data as well as the interface to the data.

1. Commercial use

The user may not use the database for any commercial purposes. Commercial purposes include, but are not limited to:

- proving the efficiency of commercial systems,
- testing commercial systems,
- using screenshots of subjects from the database in advertisements,
- selling data from the database

2. Distribution

The user may not distribute the database in any way. Small portions (screenshots) may be distributed in publications as long as the publication complies with the terms stated in this EULA (article 4).

The user will forward all requests for copies of the database to the Semaine database administrators.

3. Access

The user may only use the database after this EULA has been signed and returned to the HCI² Group at Imperial College London. The user must return the signed EULA by email, in PDF format.

eula@semaine-db.eu

Multiple users may sign one EULA in order to grant access to a group of researchers. Each researcher however must register with an individual username and password.

The user may not grant anyone access to the database by giving out their username and password.

4. Publications

Publications include not only papers, but also presentations for conferences or educational purposes.

The user may use screenshots of subjects in publications only if that particular subject has explicitly granted the permission to use his or her recordings in publications. The database specifies whether a user has given this consent to use their imagery in publications or not.

All documents and papers that report on research that uses the Semaine Database will acknowledge this as follows: "(Portions of) the research in this paper use the Semaine Database collected for the Semaine project (www.semaine-db.eu) [x]", where [x] is a reference to the following publication:

G. McKeown, M.F. Valstar, R. Cowie, M. Pantic and M. Schröder, "The SEMAINE database: annotated multimodal records of emotionally coloured conversations between a person and a limited agent", IEEE

5. Research

The user may only use the database for scientific research, teaching, and/or classroom use. Any models derived using data from the dataset may only be used for scientific, non-commercial applications.

6. Changes

The Semaine consortium is allowed to change this EULA at any time; users will be informed about changes beforehand and given the choice to opt out of the new EULA. Opting out will render the previous EULA void.

7. Warranty

The database comes without any warranty, neither the iBug Group at Imperial College London nor the Computer Vision Lab at the University of Nottingham can be held accountable for any damage (physical, financial or otherwise) caused by the use of the database. No legal claims of any kind can be derived from accepting and using the Dataset. The iBug Group at Imperial College London and the Computer Vision Lab at the University of Nottingham will try to prevent any damage by keeping the database virus free.

I have read and understood the user agreement and will comply with it.
